

## Application Procedures:

If you want to apply for the dormitory, please first read the ["Guideline for the Prevention of COVID-19 Infections in On-campus Dormitories"](#) and the following precautions regarding the novel coronavirus (COVID-19). After that, please read the following information about the dormitory and the screening process. Please apply by the deadline on the condition that you pledge to live in the dormitory in accordance with the dormitory regulations, accept university's guidance in daily living, agree with and abide by the dormitory "Guideline for the Prevention of COVID-19 Infections in On-campus Dormitories" when you are given approval to reside in the dormitory.

### ◆Notes about the novel coronavirus (COVID-19)

Due to the global outbreak of COVID-19, different rules for living in the dormitories are required than usual. Those who wish to live in the dormitory should consider the following risks before applying.

- **If a resident in the dormitory is found to be infected**, we may close the whole floor or dormitory. In addition, if the infection situation in Tokyo worsens significantly, we may request all the dormitory residents to move out temporarily.
- **The resident confirmed to be positive** will be asked to move out of the dormitory temporarily and hospitalized or asked to move to a hotel designated by the capital for medical treatment under the guidance of the public health center, medical institutions, etc. (depending on the situation of coronavirus in Japan and Tokyo, different measures may be taken in the future depending on the public health center, medical institution, etc.). If the public health center determines that the dormitory resident is a "dense contact person," the resident will be asked to get tested and move from the dormitory according to the guidance of the public health center and university.
- **When a declaration of emergency or a request/notification by an administrative agency is issued:** Please note that not only when somebody is infected or have symptoms with new coronavirus at our university, but also when the infection situation in Tokyo has significantly deteriorated, when a new emergency situation is declared or a request/notification issued by the government agency in the future, depending on the content, you may not be able to enter the dormitory, or you may be asked to leave the dormitory temporarily in order to ensure the health and safety of the dormitory residents, even if you have entered the dormitory.

Guidelines for Activities to Prevent the Spread of COVID-19 (BCP: Business Continuity Plan)

- **In the dormitory**, please follow the rules and guidelines set by the university and avoid "The Three Cs" in closed spaces (poorly ventilated spaces), crowded places (where many people are crowded), close-contact settings (conversations and joint actions within reach of each another). Observe measures to protect others and yourself from infection, such as wearing a mask outside your rooms, ventilating your rooms, washing your hands, disinfecting your hands and fingers, and taking your temperature.
- **Dormitory Rooms and Common Areas:** Most of the rooms in the dormitory are designed for twin rooms, and most likely you will move into a shared room. In addition, toilets, kitchens, living rooms, etc. are also shared. The common areas will be cleaned and disinfected by a professional company on a regular basis.

- Due to the group living environment of dormitory students from all over the world, it is difficult to say that there is no risk of infection. If you are concerned about that, please consider living in a residence other than a dormitory.

If you have not been vaccinated twice against each of these acute contagious diseases, please receive additional vaccinations at a healthcare facility so that the total number of vaccinations for each disease becomes two.

To live in the dormitories, receiving vaccinations is essential. Please make sure to check your vaccination history and receive vaccinations to protect yourself against contagious diseases and to prevent mass infections or the spread of infections on campus.

- \* The University recommends vaccination for COVID-19.
- \* ICU considers receiving the above vaccinations as the rule for communal living on campus.
- \* These contagious diseases are designated as "contagious diseases that should be prevented by educational institutions" by the School Health and Safety Law (unofficial translation). If you contract any of these diseases, this law forbids you from attending ICU until you receive medical clearance from a doctor.
