

PCM Workshop II - Monitoring and Evaluation

As a traditional training in Autumn Break, this year 12 second-year JDS fellows participated in PCM (Project Cycle Management) workshop II during November 25th-28th, which was conducted by IC Net Ltd. Based on the knowledge-Project Planning-learned from last year, JDS fellows studied Project Monitoring and Evaluation this time, which is to guarantee the success of any comprehensive project or program.

During the training, fellows continued analyzing the case study used in workshop I in small groups and then discussed the monitoring procedure as members in this case project as well as the evaluation procedure as a third party.

The Autumn Break is the shortest one among vacations in ICU, but the most colorful one. Four days training during this wonderful season brings some fresh ideas to all fellows.
